## On-Demand Technical Service

Do you have a formulary question?

Are you in need of a second opinion, or someone to bounce an idea off of?

Does your formulation need that little extra tweak?

E-mail us at [CASETechSupport@barentz.us](mailto:CASETechSupport@barentz.us) to start a conversation today!

# Product Offering

## POWDERED PRODUCTS

- Redispersible Polymers
  - Vinyl Acetate
  - Vinyl Acetate VEOVA
  - Vinyl Terpolymer
  - Styrene Butadiene
- Rheology Modifiers
  - Hectorite Clay/Organo-clay
- Additives
  - Powdered Defoamer
  - Powdered Air Entrainers
  - Powdered Foaming Agents
  - Accelerators
  - Super Plasticizer
- Pozzolans
- Water Repellants & Efflorescence Control
  - Calcium Stearate
  - Silane/Siloxane
  - Sodium Oleate
- Functional Fillers
  - Hollow Ceramic Spheres
- Color
  - Chromic Green Pigments
  - Iron Oxide
  - Ultramarine Blue

## LIQUID PRODUCTS

- Polymers
  - Acrylic Emulsions
  - Vinyl Emulsions
  - Styrene Butadiene Emulsions
  - MDI Isocyanates
  - Epoxy Resins
- Rheology Modifiers
  - Hectorite Clay/Organo-clay
  - HASE Thickeners
  - NiSAT/HEUR Thickeners
- Additives
  - Defoamer Emulsions
  - Dispersants
  - Air Entrainers
  - Foaming Agents
  - Super Plasticizer
  - Mold Release
- Water Repellants and Efflorescence Control
  - Silane/Siloxane
- Color
  - Pigment Dispersions

## SPECIALTY PACKAGING

- Plastic, Steel, and Tin Containers

\* Some Product Classes may carry geographic restrictions. Please discuss these with your Barentz Account Manager.

# CASE Technical Laboratories

## Technical Service, Laboratory Support, & Application Projects

### Technology Support for Customers & Principals

CASE works hand-in-hand with our customer and principal partners to provide outstanding technical support. Our CASE Technical Labs have extensive development and testing capabilities, including raw material selection & optimization, prototype formulation development, application testing, and product quality troubleshooting. Contact CASE today to learn more.

### Laboratories:

- CASE / HI&I Lab – Boca Raton, FL
- Canadian Client Solutions Lab – Oakville, ON

### Starting Point Formulations

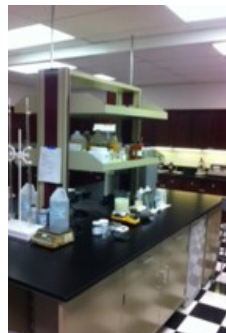

- Formulation substitution utilizing Barentz Principals
- Quick turn around
- Great resource for our customers & principals

### New Product or Formulation Development

- Working hand in hand with our customers to develop new products
- Introduction of new technology
- Entrance into a new market with existing technology

### Raw Material Qualification

- Verify product performance
- Raw material screening
- Ladder studies
- Problem solving

# Barentz.

Always a better solution.

### SPECIALTY INTERMEDIATES

- Acrylates (GAA, 2-EHA, BA, EA, MA)
- Adipic Acid
- Ammonium Acetate
- Ammonium Polyphosphate
- BEPD (2-Butyl-2-Ethyl-1,3-Propanediol)
- Benzoic Acid (Tech & Food grade)
- Calcium Acetate
- Copper Acetate
- Dimethyl Acetamide (DMAC)
- Dimethyterephthalate (DMT)
- Isobornyl Acrylate (IBOA)
- Isobornyl Methacrylate (IBOMA)
- Isophthalic Acid
- Magnesium Acetate, tetrahydrate & anhydrous
- Maleic Anhydride (MAN) - Briquette, Molten, Pastilles
- Manganese Acetate, tetrahydrate
- Melamine
- Methacrylates (GMAA, MMA, nBMA, iBMA)
- Neopentyl Glycol (NPG)
- Paraformaldehyde
- Pentaerythritol (Mono / Tech), Dipentaerythritol (85% / 90%)
- 2,4 Pentanedione (Acetyl Acetone)
- Phosphorus Pentoxide
- Potassium Acetate
- Sodium Acetate, anhydrous & trihydrate
- Specialty Monomers (GMA, HEMA, HPMMA, HEA)
- Terephthalic Acid
- Trimellitic Anhydride
- Trimethylolpropane (TMP)
- Zinc Acetate, dihydrate
